

HOW TO MAKE A BRACELET

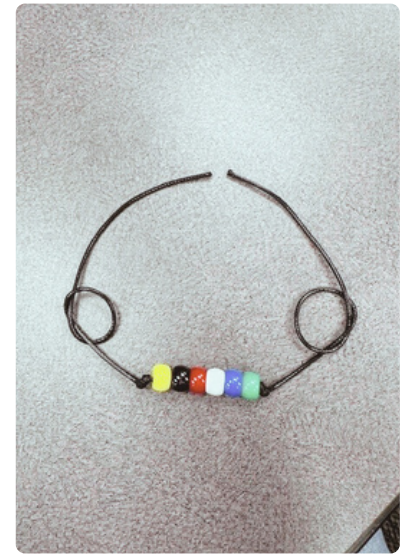

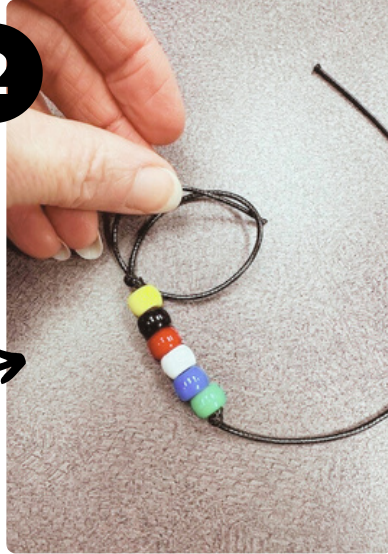

Add the colored beads and center them on the string. Tie knots on each side of beads.

1

Make a loose knot on each side - equal distance from the beads - but do not tighten the knots. For smaller wrists, make sure the loose knots are closer to the beads.

2

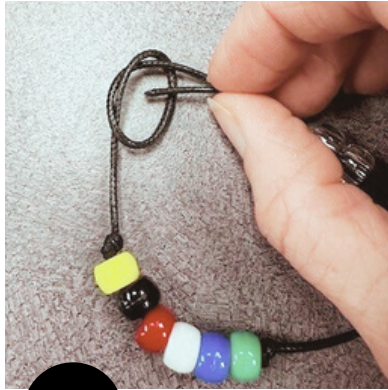

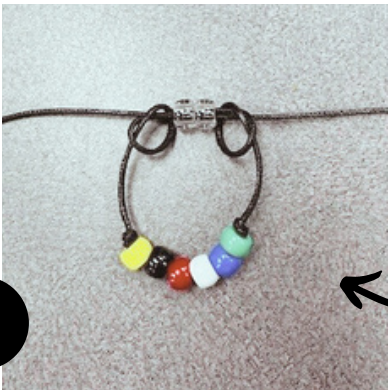

Feed the end of the other string through the other loose knot.

Feed the end of one of the strings into the loose knot.

Feed the other string through both of the beads

Add the two clear beads to one of the strings.

6

7

Tighten the knots. Pull the ends of the string to make the bracelet smaller. To loosen the bracelet, gently pull by the knots.
